PDREP Publish – 01 June, 2014
The following CSRs are included in release Version: 5.0.16

FEEDBACK S/N	AFFECTED PROGRAM	TITLE	CHANGE NARRATIVE
1000670	Facility Oversight Plan (FOP)	FSIP User Profile	Removes obsolete message when changing user's profile to Management access..
1100460	DoDAAC Search	Short Name vice Activity Name	DoDAAC search now also searches activity name along with the short name column as it was when performing a lookup search.
1200081	Feedback	Completed/Cancelled By	Adds tracking for the person who last entered the completed/cancelled date.
1200676	PDREP	Spell Check	Adds spell check capability to narrative fields in PQDR.
1201015	Warranty	Handle results of matches found in Sweep	Matches Warranty with QDRs, MIRs, and SDRs by contract number or UII
1300104	Access	Help Desk Privileges	Expands Help Desk personnel access to update additional user profile information at the non-management level.
1300307	PQDR	PQDR - Control Number Label	Changes "Case Number" on the PQDR base page to "Control Number" for screening, action, or support points on the base pages so it matches the data input labels on the screening action, support point, and Adhoc pages.
1300321	PQDR	PQDR - Control Numbers	Adds PQDR Screening, Action, and Support Point Control numbers to the SF368 Supplemental Data Page under a header of "Other Control Numbers".
1300347	PQDR	Display of CSI/CAI Indicator	CSI/CAI indicator displayed in header of all PQDR base pages in bold red to alert users.
1300359	PQDR	Mandate Acknowledge Receipt By All Recipients	Update PQDR process flow as per 842P requiring all PQDR recipients to acknowledge receipt of PQDR prior to processing. Options available prior to acknowledgement are review data, send back incorrect recipient to previous level, reassign within level, or acknowledge PQDR. Also prior to acknowledgement, the previous level will be able to retract PQDR. Once acknowledged, retraction link at previous level is removed.
1300421	PQDR	PQDR Search Tabs Results	Make all PQDR search tab results sortable by column titles and keep the title color white on blue instead of blue on blue and a rollover color of red.

1300422	PQDR	Customizable PQDR List Results	Make Customizable PQDR list results sortable by column titles and keep the title color white on blue instead of blue on blue and a rollover color of red.
1300473	PDREP	External Links	The external links page has been updated so all external links create their own pop-up windows.
1300487	Feedback	Save button	Adds lock on the save button so it can only be clicked once, before another save may be completed.
1300571	NSN	FSC and NSN edit web page	Corrects unhandled exception caused when attempting to delete an FSC or NSN record; and replaces with a warning explaining why the FSC or NIIN could not be deleted.
1300643	Warranty	Pagination of results for Warranty/SOR	Allows pagination of results for Warranty/SOR Searches
1300707	Main Menu	Request Access Update Link	Adds a link to the main menu so customers can request changes to their user account for update user info or have their user accounts access privileges updated.
1300794	PQDR	Submitter Page Block 12c Upgrade	Makes Block 12c Last Repair Facility (CAGE or DoDAAC) to auto populate the LRA's Name, Address, City, State, and Zip in the same manner as Block 9 a/b functions.
1300824	Warranty	Unique Identifier	Matches Warranty information with SDR/QDR/MIR
1300876	PQDR	Location and Accessibility of Warranty Fields	For Army users only, supplemental warranty fields other than 15.a. Item Under Warranty and 15.b. Warranty Expiration Date will be masked at Army Originator. The following warranty fields are viewable and editable at the Army Screening Point and Army Action Point levels. These fields are also viewable at the Army Support Point level: Warranty Item Name, FSC, NIIN, Warranty Item Serial Number, Warranty Item Claim Type, Warranty CAGE, and Warranty Part Number.
1300908	Feedback	Completion/Canceling User	Captures the user information of when feedback record is completed or canceled.
1300967	FOP	Active/Inactive Button	Makes the active/inactive button on FOP a status button that will stop the automatic for the FOPs that do not have active contracts
1300988	PQDRII	PQDR - Op Time at Failure Number and Units	Validates operating_time_of_failure and operating_cycles_at_failure (block 7) when PQDRs are received from PQDRII.
1400004	DoDAAC	TYCOM Updates	Adds an editable field to update and add TYCOMs.
1400006	PQDR	842P - Document Source	Removes "Document Source" field from PDREP PQDR pages, as it is obsolete, and not an 842p required field.

1400007	PQDR	842-P Action Point PQDR Retraction	Adds "Retract PQDR" link on the Action Point page. This automates the send message to support point "Notify Support Point about PQDR Retraction". Retraction link is only available until the Support Point acknowledges the PQDR then the link is removed and the letter is hidden from correspondence. .
1400034	PQDR	L1/SS Material Verification - E-Mail Address	Adds correct phone and email to L1/SS block
1400045	SDR	Repeating Remarks	Stops multiple entries of the same comments in the Remarks Block
1400048	SDR	Ability to Alter Previous Remarks Disabled	Date stamps and attributes remark entries, disallowing overwrites
1400092	Warranty	Spread sheets	Changes the spread sheet so there are no merged data cells. This helps the user for data copying and editing.
1400094	Warranty	PDF Download	Allows for the PDFs to work with BFO extended License
1400126	FOP	Worklist	Combines the Surveillance Plan Worklist tab and the Report Tab in the FOP module
1400130	PQDR	Remove "aviation_ind" Field from QDR Tables	Removes Aviation Indicator field from the PQDR database which has been replaced by Product Type Code.
1400143	PQDR	EZPQDR Draft Product Type Disappears	Retains Product Type Code in EZ PQDR when PQDR is in draft status and Originator reloads PQDR.
1400150	CAD	CAGE / DODAAC case sensitivity	Makes CAGE code and DODAAC not case sensitive
1400170	SAP	MGMT Access User Rights	Record deletion is possible for records only with a matching DoDAAC, regardless of USERID.
1400185	PQDR-II	Product Type Code Trigger	Sets Product Type Code to "O" for all new PQDRs imported through PQDRII. If PQDR already exists in PDREP, it only sets to "O" if null in PDREP.
1400210	Warranty	Import PDFs (Warranty)	Ensures file processing for PDFs that come into PDREP are absorbed into proper directory.
1400218	SURVEY	Adding a category	Allow user to add a category that was previously deleted

1400266	PQDR	ARISE PQDR Web Service	Updates fields made available to the ARISE Web Service schema per AMOCOM specification
1400270	SDR	SDR Sequence Number	Changes the sequence number message to "Sequence Number must be between four and six characters".
1400293	PQDR	Delete PQDR Originator - Non-Management	Reinstates delete PQDR privileges for Originators with non-management access to delete their own PQDRs if at draft status and Originators with management access to delete all PQDRS within their activity if in draft status.
1400302	SDR	Requisition Misspelled	Corrects the spelling of "Requisition" in the EZSDR message "Requisition Number is a Duplicate".
1400346	CAD	CAD Usage in PPIRS	Removes "Used in PPIRS=Y/N" pull-down for all users without full access
1400380	EZ-MIR	Message Update	Updates message received when trying to save an EZ MIR after adding batch/lot/heat#
1400431	Facility Oversight Plan (FOP)	NSEP Programs Update	Adds new programs to list within the FOP Record.
1400441	SDR	Add CAGE Search to SDR	Allows users to search and process SDR's by CAGE
1400507	PQDR	100% CPU Letter Replacer - Potential Source	Inserts a new message to PQDR users when trying to compile a letter that gets caught in an infinite loop. This should alleviate users from timing out when compiling letters.
1400523	WARRANTY	New common jar updates	Mandatory updates to common JAR directory
1400532	RIMS	Notification dropdown list	Changes the notification dropdown list to only pull inspectors (2), QAS (3), supervisors (4) and admin (9).
1400545	Facility Oversight Plan (FOP)	Inactive Surveillance Plan Visibility	Adds the ability to view inactive Surveillance Plan data
1400562	GFP	Excel Spreadsheet Validation	Adds new validations to EZ-GFP when uploading excel spreadsheets
1400640	PQDR	Email Attachment Link	Strengthens security of functionality currently used in production
